DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-24, drawn to reaction products of aminoaryl derivatives.

Group II, claim(s) 1-24, drawn to reaction products of amino acids and derivatives.

Group III, claim(s) 1-24, drawn to reaction products of substituted amines.

Group IV, claim(s) 1-24, drawn to reaction products of substituted amides.

Group V, claim(s) 1-24, drawn to reaction products of glucamines.

Group VI, claim(s) 1-24, drawn to reaction products of dendrimers.

Group VII, claim(s) 1-24, drawn to reaction products of polyvinylamines, derivatives or copolymers thereof.

Group VIII, claim(s) 1-24, drawn to reaction products of alkylene polyamine.

Group IX, claim(s) 1-24, drawn to reaction products of polyoxyethylene bis amine or aminoalkyl.

Group X, claim(s) 1-24, drawn to reaction products of aminoalkyl piperazine and derivatives.

Group XI, claim(s) 1-24, drawn to reaction products of bis (aminoalkyl) alkyl diamines.

Group XII, claim(s) 1-24, drawn to reaction products of polyethyleneimines.

Page 3

Application/Control Number: 10/019,178

Art Unit: 1751

Group XIII, claim(s) 1-24, drawn to reaction products of 1,4-bis-(3-aminopropyl)-1,3-piperazine.

- 2. The inventions listed as Groups I-XIII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Any feature which unites the inventions fails to make a contribution over the prior art in view of the reference marked "X" in the PCT Search Report.
- 3. During a telephone conversation with Mr. Jim McBride on July 31, 2003 a provisional election was made with traverse to prosecute the invention of Group XII, claims 1-20, 22 and 23. Affirmation of this election must be made by applicant in replying to this Office action. No claims were withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention, but the claims were searched and examined only to the extent that they read upon the elected invention. No claims can pass to issue until all non-elected subject matter has been deleted from the claims.
- 4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Claim Rejections - 35 USC § 112

5. Claims 1-20 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for compositions which result in the formation of

Art Unit: 1751

particles, does not reasonably provide enablement for use of any and all carriers with melting points of less than 30 degrees C. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make or practice the invention commensurate in scope with these claims. Some particle forming step appears to have been omitted from the recited process. For instance, GB 2,102,292 A discloses a composition comprising the reaction product of an aqueous solution of polyethyleneimine with aldehydes, but it doesn't appear that any particle formation is inherent in the process.

6. Claims 21 and 22 provide for the use of an amine reaction product, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claims 21 and 22 are rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd.* v. *Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

Art Unit: 1751

Double Patenting

7. Claims 1-20 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-24 of copending Application No. 10/019,177. Although the conflicting claims are not identical, they are not patentably distinct from each other becausthe claims of the '177 recite a process as claimed presently, except that the amine reactio product is mixed with an acid carrier, rather than a carrier with a melting point below 30 degrees C. As there are acids with melting points lower than this, it would have been obvious at the time the invention was made to use such a carrier, because the present claims recite carriers with a melting point below 30 degrees C, and acids with such melting points exist.

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

- 8. Any prior art made of record and not relied upon is of interest and is considered pertinent to applicant's disclosure.
- 9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to the examiner, Dr. John R. Hardee, whose telephone number is (703) 305-5599. The examiner can normally be reached on Monday through Friday from 8:00 until 4:30. In the event that the examiner is not available, his supervisor, Dr. Yogendra Gupta, may be reached at (703) 308-4708.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-0661.
